

MarineLab

Experience

Key Largo,
Florida

What teachers say about our summer workshops...

Thanks for offering top-notch science with great field trips.

Just getting teachers together to talk about good teaching practices is good—adding in a whole new set of concepts makes it even better! The best professional development ever!

Awesome experience...& I wish that I could bring all of the teachers I work with down to MarineLab.! This workshop was so educational on so many levels, whether or not a science teacher!

Really liked the progression of field trips, each was better than the last. Instructors were VERY knowledgeable.

Overall, I had an incredible & amazing experience. In 5 days, I learned about the ecology of the Keys and visited spectacular places.

Great course! Enthusiastic and knowledgeable instructors, clear in-depth course materials (not too much/too little), well maintained boats, nice variety of learning avenues, well planned and organized.

Favorite things...

Besides the snorkel trips to the coral reefs, I was extremely impressed with the knowledge, pleasantness, kindness and compassion of all the instructional staff – wonderful job!

The professionalism of ALL of the staff, as well as their expertise and knowledge of the topics being discussed! They also made sure that everyone was having an enjoyable time learning!

Definitely the field trips into the various marine ecosystems. The lectures & labs were great to introduce and reinforce what we were seeing in the various marine ecosystems.

Besides wonderful snorkeling, the information taught was excellent. I know I'll be able to work it into my curriculum.
